

alberto fernández veiga

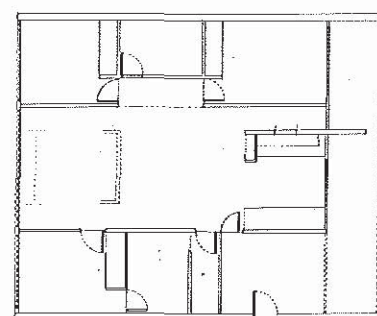

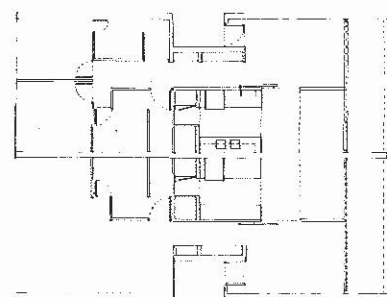

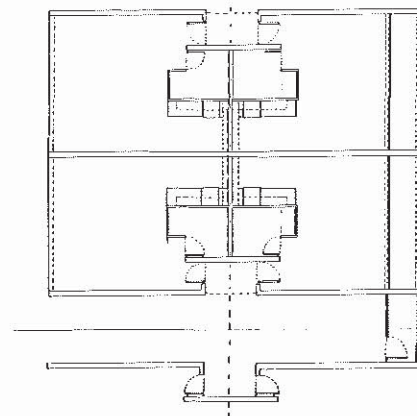

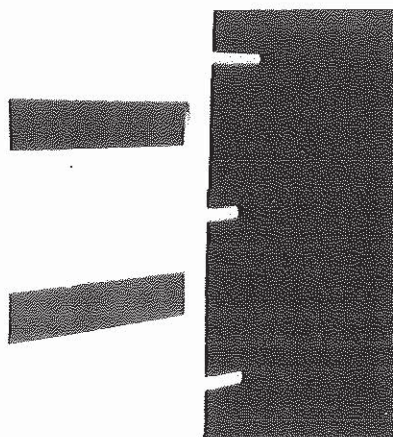

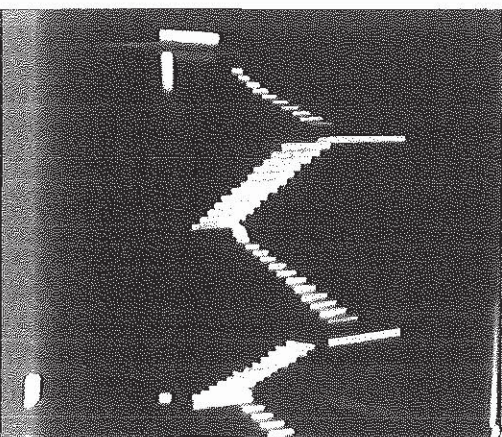

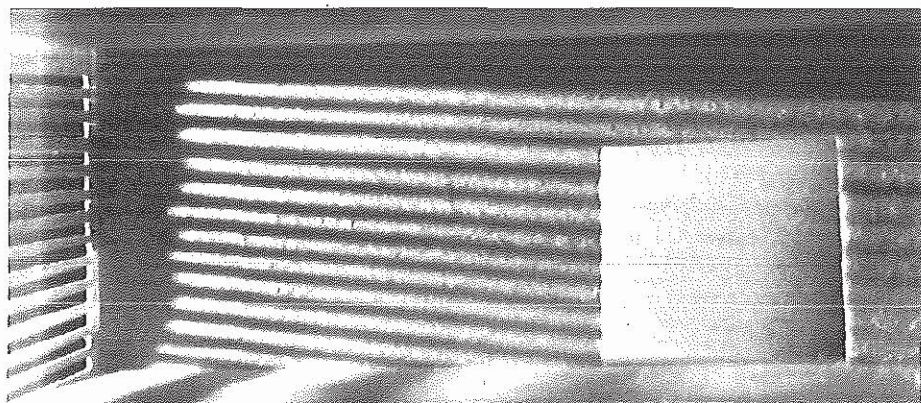

La actuación se basa en la construcción del lugar: la transformación del espacio en lugar. Transformación en un terreno de experimentación, donde predomina el vacío frente a lo construido, donde se difuminan los límites entre privado y público, proyecto entre modelar el terreno y construir [...]. Proyecto que genere efectos urbanos que incorporen las ideas de inestabilidad y cambio.

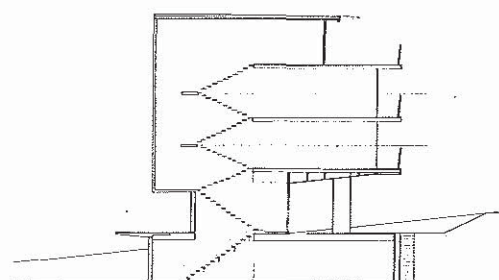

The intervention is based on the conception of place; the spatial transformation of the place. The transformation of an experimental terrain, in which voids prevail over buildings, where the public-private limits are blurred, a project somewhere between the modeling of the terrain and building [...]. A project that generates urban effects that include the ideas of instability and change.
