

SUBJECT INDEX

- Acid-base, red-ox concepts, 59
Adaptation, seawater, ATPases, 231
Aging
 protein turnover, 207
 rat brain aminopeptidase, 149
Albumin gradient, platelet isolation, 45
Aminopeptidase, rat brain, 149
Antibiotics, macrophage functions, 215
Apolipoprotein E (apo E), hypercholesterolemia, 15
Artery, tail rat, 9, 155
ATPase activity, seawater adaptation, 231
 β_3 -Adrenergic agonist, obesity, 255
Blood
 erythrocytes
 glutathione peroxidase, 167
 lithium transport, 77
 leukocytes, circadian rhythms, 143
 lymphocyte subpopulations, epinephrine, 143
 platelets
 isolation, albumin gradient, 45
 serum
 cholesterol, 23, 49
 lipids, furosemide, captopril, 89
 lipoproteins, 15, 23
 rat LH, enzyme immunoassay, 95
 triglycerides, 23
Body weight, *ob* fragment peptides, 123
Bone densitometry, liver cirrhosis, 113
Calcium, intestinal absorption, 89
Captopril, metabolic effects, 89
CCl₄, cirrhosis, osteopenia, 113
Cells
 leukocytes, circadian rhythms, 143
 macrophages, antibiotics, 215
 platelets, isolation, 45
 red neonatal, lithium transport, 77
Cephalosporins, intestinal enzymes, 31
Cholesterol, newborns, 23
Chronobiology, sprinting performance, 247
Circadian rhythms
 lymphocyte subpopulations, 143
 sprinting performance, 247
Coat color genes, steroidogenesis, 83
Corticosterone, melatonin, 239
Cotransporter activation, osmolarity, 103
Cyclosporine, pituitary hormones, 161
2-Deoxyglucose, arterial contractility, 9, 155
Development, rat brain aminopeptidase, 149
Diet effect, hypercholesterolemia, 49
Enzyme immunoassay, rat LH, 95
Enzymes
 alkaline phosphatase, 31
 aspartate aminopeptidase, rat brain, 149
 ATPases, seawater adaptation, 231
 brush border, lindane, 37
 peptidases, cephalosporins, 31
Epinephrine, circadian rhythms, 143
Estrous cycle, RU486, 223
Fatty acids, rat tail artery contraction, 155
Food intake, body weight regulation, 255
Formal charge, acid-base, 59
Fragment peptides, *ob* protein, 123
Free radicals, liver diseases, 167
FSH, cyclosporine, 161
Furosemide, metabolic effects, 89
Gastrointestinal system
 brush border enzymes, lindane, 37
 calcium absorption, 89
 enzymatic activity, cephalosporins, 31
 epithelial permeability, osmolarity, 103
 sugar absorption, 89
Genotype, steroidogenesis, 83
GH, cyclosporine, 161
Glucose, intestinal absorption, 89
Glutathione peroxidase, liver diseases, 167
Glycogen, arterial contractions, 9

- Ha-ras*, function, regulation, 173
 γ-Hexachlorocyclohexane, intestinal enzymes, 37
 Hormones
 adrenaline, lymphocyte subpopulations, 143
 FSH, cyclosporine, 161
 GH, cyclosporine, 161
 melatonin, 5HT, endocrine effects, 239
 progesterone, estrous cycle length, 223
 prolactin
 cyclosporine, 161
 GHRH, 139
 RU486, 223
 Testosterone, genotype, 83
 TSH, cyclosporine, 161
 Hydroxyprogesterone, coat color genes, 83
 Hypercholesterolemic (RICO) rat, apo E, 15
 Hyperprolactinemia, cyclosporine, 161
 Hypothermia, pulmonary circulation, 1
 Hypothalamic serotonin, melatonin, 239

 Immunoblotting, apo E evaluation, 15
 Intestinal absorption
 calcium, furosemide, captopril, 89
 glucose, furosemide, captopril, 89
 mannitol, osmolarity, 103
 Intestinal epithelium
 paracellular permeability, 103
 Isoelectrical focusing
 apo E characterization, 15

 Ketone bodies, brain salmon, 131

 Leptin
 body weight, 255
 fragment peptides, 123
 Leukocytes, circadian rhythms, 143
 LH
 enzyme immunoassay, 95
 cyclosporine, 161
 Lindane, intestinal enzymes, 37
 Lipids, furosemide, captopril, 89
 Lipoperoxidation, liver diseases, 167
 Lipoproteins
 apo E, 115
 newborns, 23
 Lithium transport, red cells, 77
 Liver cirrhosis, osteopenia, 113
 Liver diseases, glutathione peroxidase, 167
 Lymphocyte subpopulations, catecholamines, 143

 Macrophages, phagocytic function, 215
 Melatonin, hypothalamic serotonin, 239
 Methylpalmoxirate, arterial contractility, 9
 3-Methylhistidine, muscle breakdown, 207
 Mink, coat color genes, 83
 Muscle protein turnover, 207

 Neonatal red cells, lithium transport, 77
 Norepinephrine, lymphocyte subpopulations, 143
 Nutrient turnover, body weight, 255

ob protein, fragment peptides, 123
 Obesity, leptin, 123
 metabolic models, 255
 Oncogene, *ras* gene family, 173
 Osmotic loads, paracellular permeability, 103
 Osteopenia, liver cirrhosis, 113
 Oxfenicine, arterial contractility, 9, 155
 Oxidation number, red-ox, 59

 p21ras, structure, function, 173
 Paracellular permeability, osmolarity, 103
 Pesticides, intestinal enzymes, 37
 Platelet isolation, albumin gradient, 45
 Post-feeding metabolism, salmon, 131
 Post-lunch dip, performance, 247
 Progesterone, coat color genes, 83
 estrous cycle length, 223
 Prolactin, cyclosporine, 161
 melatonin, 239
 RU486, 223
 Protein turnover, aging, 207
 Pulmonary artery pressure, 1
 Pulmonary circulation, hypothermic perfusion, 1
 Pyruvate rat tail artery contraction, 155

 Rainbow trout, seawater adaptation, 231
 Rat LH, enzyme immunoassay, 95
 red-ox, acid-base concepts, 59
 RU486, LH, estrous cycle length, 223

Salmo salar, brain, liver, metabolism, 131
 Seawater adaptation, rainbow trout, 231
 Steroidogenesis, coat color genes, 83
 Subcellular distribution, brain aminopeptidase, 149

 Tail artery
 endogenous substrates role, 9
 exogenous substrates, 155
 Teicoplanin, phagocytic function, 215
 Testes, steroidogenesis, genotype, 83
 Testosterone
 coat color genes, 83
 Thermogenesis
 ob fragment peptides, 123
 body weight regulation, 255
 Thyroxine, melatonin, 239
 Tight junction, osmotic loads, 103
 Triacylglycerol, arterial contractions, 9
 Triglycerides newborns, 23
 TSH, cyclosporine, 161

 Vancomycin, phagocytic function, 215
 Water flow, intestine, osmolarity, 103
